Solar Monitoring Solutions

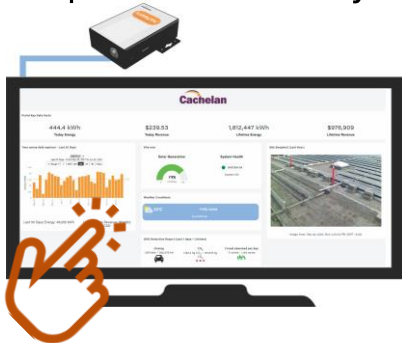

Happy Holidays & New Years from Cachelan!

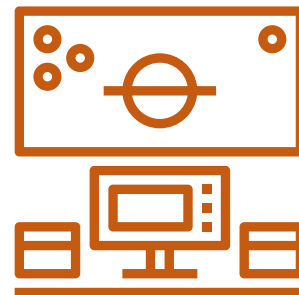

A big **thank you** to our customers, whether you've joined us this year or been with us for a long time!

It has been a big year for Cachelan as we have developed and introduced new products and features for our SolarVu users. We have introduced a new product line 'LobbyVu' for customers who would like to display real-time data of their solar site to a public screen. We continue to design and build custom 'SCADA' equipment for various LDCs and connected C&I and utility scale solar sites.

Behind the scenes, we continue to make improvements to new hardware offerings as well as software improvements, many of which will come to SurePoint subscribers in the new year!

Feel free to [view](#) a live site that is using 'LobbyVu'.

SCADA &
Generation Forecasting

We head towards 2022 with a revamped energy portal that SurePoint customers can opt into in Beta for immediate use. [Contact us to get a live sample](#) and opt in all or portions of your portfolio. Wide roll out coming in Q1 2022!

Seasons Greetings 2021
